

Is synonymous with prestige. A brand which has developed and improved its collections to satisfy the expectations of the most demanding of customers. Straight from the testing workshops of the best kitchens in the world, into the homes of customers who require quality and technology.

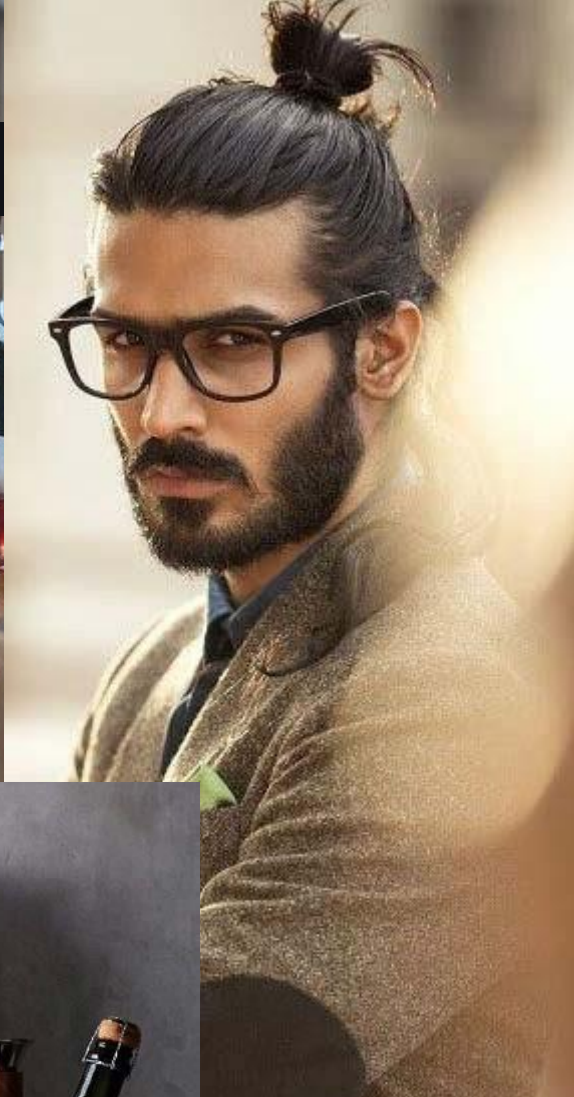

Now Sutwer is launching a new, complete collection, Oenology. Quality, design and attention to detail are the essential values of the whole collection.

Every piece of glassware and every accessory has been carefully designed for the best tasting experience of the world's best wines, beers, cocktails and liqueurs. High quality products, with a manufacturing process which is monitored from start to finish. The result is a collection of pieces which are built to last, and which have a series of unique features.

Both the Wine and Bar Ware collections are worth a special mention because they embody a concept of innovation in the materials used which makes the pieces exceptional, created with 100% recyclable glass.

Let us toast a new collection designed and manufactured to satisfy the most demanding of customers

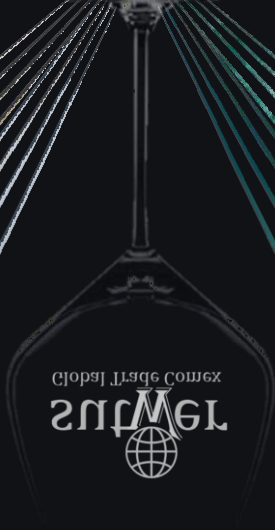

Target

People with an urban and cosmopolitan profile, independent, educated and classy. He looks for moments of disconnection and likes to relax enjoying a drink as a reward from the sacrifice of time and effort demanded by his work and daily life. His home is minimalist, elegant, warm, comfortable and welcoming for both, to enjoy in solitude and to share with family and guests. A place you do not want to leave.

The Oenology targets are hyper-connected, like to host, receive his friends at home and also share their discoveries, tastes and gastronomic experiences with his contacts online, to support his opinions and recommendations, justify their decisions and enrich its social capital.

They have a multicultural sensibility, restlessness for knowing other customs and different ways of living. They consider holidays as the opportunity to immerse himself in a foreign culture and the enjoyment of his trips will depend on the authenticity of the experience.

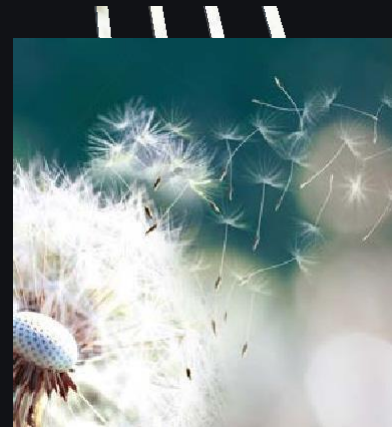

Four elements of nature
Fusion for the highest perfection

EARTH

FIRE

AIR

WATER

100% RECYCLABLE ECO CRYSTAL

EARTH

The purest of raw materials

A careful, meticulous selection of raw materials which become the best quality glass.

Sand is the essential ingredient needed to obtain the first ECO CRYSTAL in the glass market, which is 100% recyclable.

The highest quality shine and transparency have been achieved without using highly pollutant chemicals.

A pleasure for the senses and a commitment with the future of the planet.

The sand that transforms time.

FIRE

An optimum production process

Substances which melt together and then solidify, attaining their shape in a careful, elegant way.

The manufacturing kilns respect the environment, with zero emissions. In this way we obtain glass of the highest quality, through a fully monitored production process. Fire from passion for perfection and the right balance.

The way towards sustainability.

AIR

Pollution free

Gusts of wind that give meaning to shapes to compose a resounding collection which extols nature.

Moreover, every possible pollutant is instantly controlled by our laboratories. It is our objective to achieve zero pollution. A clean atmosphere, zero emissions. Breathe the aroma that is produced by the best liquid poured into the most noble crystal.

The shapes of wind.

WATER

Clean energy

We are water. The essence of all life. Contents and container. The essence which gives us our greatest maturity.

75% of the energy consumed in manufacturing our glass is of geothermic origin, renewable energy which uses underground heat for central heating and to obtain hot water and generate steam ecologically.

Immerse yourself in the essence of the pleasures of life.

The essence of everything.

EARTH

FIRE

AIR

WATER

The first Greek philosophers considered that the Universe was built using four basic elements:

EARTH, FIRE, AIR and WATER.

They said that with only these elements it was possible to create the perfect materials which were to be found on Planet Earth.

IPSUM IS THE PERFECT ESSENCE OF THE ALCHEMY OF THESE 4 NATURAL ELEMENTS.
